Executive Biographies

Sheng Yeo, OrionVM CEO

Sheng Yeo co-founded OrionVM while attending the University of Technology in Sydney, Australia. From their dorm room his team hatched an idea to build an IaaS company using a completely new technology blueprint. Sheng leads the team as CEO and drives innovation within the firm, supported by his versatile background, detail-oriented nature and strong management skills. Sheng has worked across every function of a company and brings over seven years of technology experience to the organization. He received recognition by the EY Entrepreneur of the Year 2013, he has been a lecturer for undergraduate and post-graduate Cloud Infrastructure subjects at the University of Technology in Sydney, Australia and has presented at several industry conferences including Aus-Cloud, Tech23, the NICTA NSW Government Cloud Briefing, Cloud Partners, Cloud Expo West, Pacific Telecom Council and a CeBIT Presentation on the Use of Cloud Infrastructure.

Alex Sharp, OrionVM CTO

Alex Sharp co-founded OrionVM in Sydney, Australia. As CTO, Alex architects and manages the construction of the technology that keeps OrionVM on the cutting-edge of cloud computing. In addition to his role at OrionVM Alex is a strong supporter of the startup community, serving as a Director at AusCloud and a technology advisor at Collusion. He also provides mentorship to new ventures at Incubate, a startup incubator run by his alma mater, the University of Sydney, where he studied both Science and Information Technology. He has also provided technical advice to groups within NICTA, the University of Sydney and UNSW, and was a guest lecturer for the postgraduate cloud computing course run by the University of Sydney. Alex recently received the Hills Young Innovator of the Year iAward in 2014 in the cloud category for his founding role and technical contributions to the OrionVM wholesale cloud platform.

Daniel Pfeiffer, Vice President of Marketing and Partnerships

Daniel leads the marketing and partnership teams driving OrionVM's creative, communication, and strategic partner programs. His team is responsible for the development, execution and analysis of integrated campaigns; demand generation, content marketing, branding, and public and analyst relations. Daniel's extensive 20 year tech background spans the gaming, mobile, and cloud industries and includes directing marketing for Verizon Games, launching an award winning B2B mobile platform, and speaking at various technology conferences including IAB Mixx, Converge, Founderspace and AppNation. Daniel holds a bachelor's degree in Philosophy from San Francisco State University and has 6 issued domestic & international patents.

Matt Ding, COO

Matt Ding is OrionVM's Chief Operating Officer (COO) where he oversees technical operations and drives key business initiatives. Matt is a cloud industry pioneer and has been with the company since its early days working with the founding team members as Business Development Manager and then a Business Operations Manager before his recent promotion to COO. Prior to his days at OrionVM Matt spent several years as a member of the close knit IBM Australia and New Zealand six member cloud computing team, where he was responsible for fostering internal education on cloud computing. Matt holds a Bachelor of Science in Information Technology from the University of Technology Sydney and an Associate of Music, Australia (A.Mus.A) in Viola. Matt has been nominated for industry awards such as the 2014 Australian Startup Awards Zambrero Young Executive of the Year.

Advisors and Investors:

Gordon Bell, Computer Visionary

Gordon Bell is a Researcher Emeritus at Microsoft working on lifelogging. He spent 23 years at Digital Equipment Corporation as vice president of R&D; while there, he was responsible for the first mini- and timesharing computers and led the development of DEC's highly-successful VAX architecture. From 1966-1972 he was a professor of Computer Science

and Electrical Engineering at Carnegie-Mellon University. With Ken Olsen, DEC CEO, and Gwen Bell, he founded the Digital Computer Museum in Marlborough, MA (1979); becoming The Computer Museum, Boston, MA (1984); and The Computer Museum History Center, Mountain View, CA (1999, prior to the Computer History Museum (2000). Bell was involved in designing many products at Digital, and startup companies, and has been an investor/advisor/board member to over 100 startups. As the first assistant director for computing at the National Science Foundation (NSF), he led the National Research Network panel that became the NII/GII, and was an author of the High Performance Computer and Communications Initiative. He posited Bell's Law of Computer Classes (1972-2008) accounting for the new kinds of computers e.g. mainframes, … personal computers that come into existence roughly every decade. Bell is also the author of several books and papers on computing, entrepreneurship, and lifelogging. He is a fellow of the Association of Computing Machinery, IEEE, National Academy of Engineering, National Academy of Sciences, the American Academy of Arts and Sciences, and the Australian Technological Sciences and Engineering. In 1991, Bell received the National Medal of Technology from President George H.W. Bush.

Stephen Baxter, Managing Director, River City Labs
Stephen Baxter has a background in starting Internet based companies in Australia and working overseas on large scale data networks. His background prior to this was defense with a near 9 year stint as a regular soldier after enlisting at age 15 specializing in electronics, telecom, opto-electonics and guided weapon systems. In 2001 Mr. Baxter founded PIPE Networks with a school friend. PIPE (then IX Services Australia trading as PIPE Networks) started as a provider of telehousing and peering services with the operation initially based in Brisbane. Soon after these operations were expanded to Sydney, Melbourne, Hobart and Adelaide. PIPE Networks started to deploy dark fiber to customers very soon after this. PIPE Networks was listed in May 2005 (ASX:PWK) with a market capitalization of less than AU$15M. In the next 3 years PIPE Networks deployed over 600km of dark fiber, built several hundred meters of data centre space and under took to build PPC-1 – the first competitive submarine fiber optic cable in Australia. During this time Mr. Baxter was an executive director and Chief Technical Officer. Mr. Baxter left PIPE in 2008 but remained a non executive director. In March 2010, TPG Group (ASX:TPM) acquired PIPE Networks under Scheme of Arrangement for a consideration of AU$373M.

About OrionVM, Inc.:
OrionVM is a wholesale Infrastructure-as-a-Service (IaaS) provider. The company's revolutionary technology suite (virtual storage, compute, orchestration and virtual networking) enables the delivery of high-performing, highly reliable cloud solutions at market-leading price-to-performance ratios. The OrionVM Wholesale Cloud Platform supports private, public, and hybrid cloud deployments and is built either for internal consumption or resale. Efficient and distributed enterprise-grade architecture allows clients to provide their own cloud offerings at margins of up to 80% off Amazon. Partners have full control – from a complete white-label rebranding to billing integration and flexible account management. OrionVM's technical vision represents a fundamental advancement for Cloud 2.0 infrastructure, which inspired tech luminary, Gordon Bell, to become a company angel investor. Global customers include publicly listed telcos, IT service providers, and leading enterprise SaaS companies. OrionVM was also recently awarded a People's Choice Stevie Award for Favorite New Products in the category for Software - Cloud Infrastructure in The 2014 American Business Awards. OrionVM company headquarters are in Sydney Australia and in the San Francisco Bay Area. For more information, please visit www.orionvm.com or follow the conversation on Twitter @orionvm.
